Introduction

Watershed Description

The East Fork of the Lewis River is located in southwestern Washington in Clark and Skamania counties. It is the largest tributary of the Lewis River, with a drainage basin area of 217 square miles. The river runs about 43 miles from its source to its confluence with the main stem Lewis River. The eastern portion of the river drainage basin lies in the forested foothills of the Cascade Mountains within Gifford Pinchot National Forest. Major tributaries include Rock, Yacolt Mason, Jenny, Breeze and McCormick creeks.

Narrative

Rating tables 2 and 3 are used for the period of October 1, 2006 to September 30, 2007. Bank full was surveyed at 10.03 ft on 10/05/2009 with estimated flow of 7,230 cfs.

Narrative

Missing data was filled from two stations: USGS 14222500 and Ecology's Coweeman R. nr Kelso. Cause for missing data was pressure tank losing pressure. There were 116 days over the Logger Drift Assessment Error of 20% and 54 days over the Logger Drift Assessment Error of 50%. Five days exceeded the rating.
